

# FUTUREWISE TARGET 2025 - CLASS 18

## Fund objective

This FutureWise Target Date Fund is intended for members retiring between 2023 and 2027, who at retirement want to take regular withdrawals from their savings through income drawdown. It invests in an underlying fund managed by BlackRock which invests at least 70% in collective investment schemes (funds) managed by BlackRock and Fidelity. It may also invest directly in shares and bonds as well as cash or other assets that can be easily converted to cash. It aims to grow your pension pot by taking more risk when further from retirement by investing in global shares and about 10 years from its target date, gradually reduces risk by investing in bonds (government and non-government). The asset allocation changes more dynamically the closer it gets to the target date. Once the fund reaches the target date, it will hold a mix of investments (between 60% to 80% in bonds with the balance in shares) that are designed to support members taking regular withdrawals from their savings through income drawdown. This asset mix could change in different market conditions. No less than 30 months after the target date, any money still invested in the fund will be moved to the FutureWise Retirement Fund. The fund aims to invest in a manner consistent with the principles of Sustainable Investing. It will do this by investing its assets in accordance with the fund's 'ESG Policy'. This includes increasing exposure to companies that are viewed as sustainable leaders and improvers and reducing exposure to those companies viewed as laggards. The fund's ESG policy includes exclusions around investing in companies that are involved with controversial weapons (including nuclear and semi-automatic weapons), thermal coal, oil sands, tobacco and country specific restrictions. The use of ESG criteria may affect a fund's investment performance and, as such, the funds may perform differently compared to similar funds that do not apply ESG criteria. There is no guarantee the fund will be able to support regular, or any, drawdown after its maturity date.

Source: Morningstar and Fidelity International as at 30.09.2024. Performance for the fund is simulated until 30 November 2022. Simulated performance is based on the performance of the underlying funds or market indices on a NAV to NAV or bid to bid basis. This includes any income reinvested and the cost and charges (Total Expense Ratio, 'TER') of 0.5%, which may be lower or higher than the fund's actual TER shown on fund factsheets. Simulated performance is indicative only and actual fund performance may be higher or lower. Performance from the 30 November 2022 is calculated on NAV to NAV basis with net of actual TER.

\*If shown, as the life fund is less than five years old, we have modelled its performance prior to launch based on the performance of the fund that it invests into. N/A means data not available. Figures reflect the return on investment after the fund's charges have been deducted.

## Risk rating

Lower risk/return

Higher risk/return

### M1 - Medium risk/return

The potential for capital growth is generally better than the lower risk/return and lower-medium risk/return categories but the value of the fund may vary considerably either up or down.

Risk ratings on this factsheet are assigned by Fidelity. They are an indication only and take into account the volatility of the underlying fund, based on past performance (where this is available), and an internal assessment of the underlying asset types in the fund. Ratings may change, do not imply or offer any guarantee, and only apply to, and in comparison with, the funds made available by Fidelity's DC business.

## ESG Fund Rating and Quality Scores

The investment analysis company, MSCI, rates funds according to how well the companies into which the funds invest, take account of environmental, social and governance (ESG) factors. It provides scores of 1 to 10 (with 10 being the highest) in the three 'pillars' – E, S and G – and converts them into an overall rating from CCC to AAA (with AAA being the best). You can find out more about sustainable investing at <http://fidelitypensions.co.uk/sustainable-investing>

The relevant criteria and weightings are chosen by MSCI and different criteria and weightings used by other analysts may produce different results. This is a snapshot of the portfolio at the date indicated. Past ESG ratings are not reliable indicators of future ESG ratings. Representation of this ESG data is for information purposes only and does not mean the fund is committed to reaching or maintaining any level of ESG performance. The data shown should not be interpreted as promoting any ESG characteristics for the fund or indicating a sustainable investment objective. For further detail on the criteria and calculations used please contact Fidelity. If you are in any doubt whether a fund is suitable for you please contact a regulated financial adviser.

## Carbon Footprint

The investment analysis company MSCI measures a fund's carbon intensity by calculating how much CO2 is emitted by the companies it invests in. To allow companies of different sizes to be compared, the figures are adjusted according to the value of each company's sales. The table on the right shows emissions in terms of tons of CO2 for each million dollars' worth of sales.

MSCI has provided the following guidance for assessing the figures shown in the table. These ratings help to show where each fund stands in relation to the fund marketplace as a whole. As in the table, the figures are for tons of CO2 for each million dollars' worth of sales.

Very high	High	Moderate	Low	Very low
525 tons or more	250 to 524 tons	70 to 249 tons	15 to 69 tons	less than 15 tons
